

4 December 2008

I am Captain Rick, who operated the vessel Antu Cuyen a 26 foot Sea Ray Sundancer 2005, that had an in-water survey a couple months ago. The boat performed up to the boat's specifications. All the systems on the boat operated properly and we found no discrepancies with the boat. It is an extremely well kept vessel and a pleasure to drive. It is a very economical boat to operate with a sleeping capacity of 4 and a single engine. Sea Ray builds a very nice vessel and uses fine craftsmanship in the things they do. The owner has an extra battery on the boat and a built in Generator, provides both heat and air conditioning, that make this boat more valuable. Also the engine is a 300 horsepower engine compared with some you look at that only have 260 horsepower.

This boat is a well sought after model boat, full of innovative ideas and creative placement of boat components. The boat is in excellent condition, clean and well maintained. You will be extremely happy with the purchase of the boat.

Island Bound Marine Services, Inc. has been serving the boating community since 1992. Originally started strictly as a bottom cleaning service, we have grown to include all facets of boat care.

Our owner, Captain Rick Anderau, is a licensed 100 ton Master Captain with thousands of hours of boat operational experience. Captain Rick has been in, on, or under boats for over thirty years.

Our professional service team is second to none. Captain Rick's 30 years of experience is unquestionably invaluable when it comes to training personnel in boat and yacht operation. Or, you can count on the captain to professionally operate your boat to almost any destination. If she's a trailerable boat we have vehicles and licensed personnel to haul her just about anywhere.
